REASONS TO BUY PVC UV MARBLE SHEET

Realistic and beautiful

It has a texture and color very similar to natural marble, and can perfectly reproduce the luxury texture of marble, whether it is used for home decoration of the wall, the ground, or the decoration of commercial places, can instantly enhance the space style, create a high-end atmosphere, so that you feel like being in a luxury palace.

Super durable

After special UV treatment, the surface has excellent UV resistance, it is not easy to fade and turn yellow, even if it is exposed to the sun for a long time, it can remain as new. At the same time, it also has good wear resistance, scratch resistance, daily bumps and bruises will not easily leave traces, long service life, can save you the cost of frequent replacement of decorative materials.

Convenient installation

Compared with natural marble heavy and complex installation, PVC UV marble plate texture light, using a simple splicing or paste can be completed installation, greatly shortening the construction period, reduce labor costs. Even if you are a DIY enthusiast, you can easily get started and create the ideal space according to your own creativity.

Environmental protection and health

In the production process, strictly follow environmental protection standards, does not contain harmful substances, such as formaldehyde, benzene, etc., will not pollute indoor air quality, escort the health of you and your family, especially suitable for families, kindergartens, schools and other places with high environmental requirements.
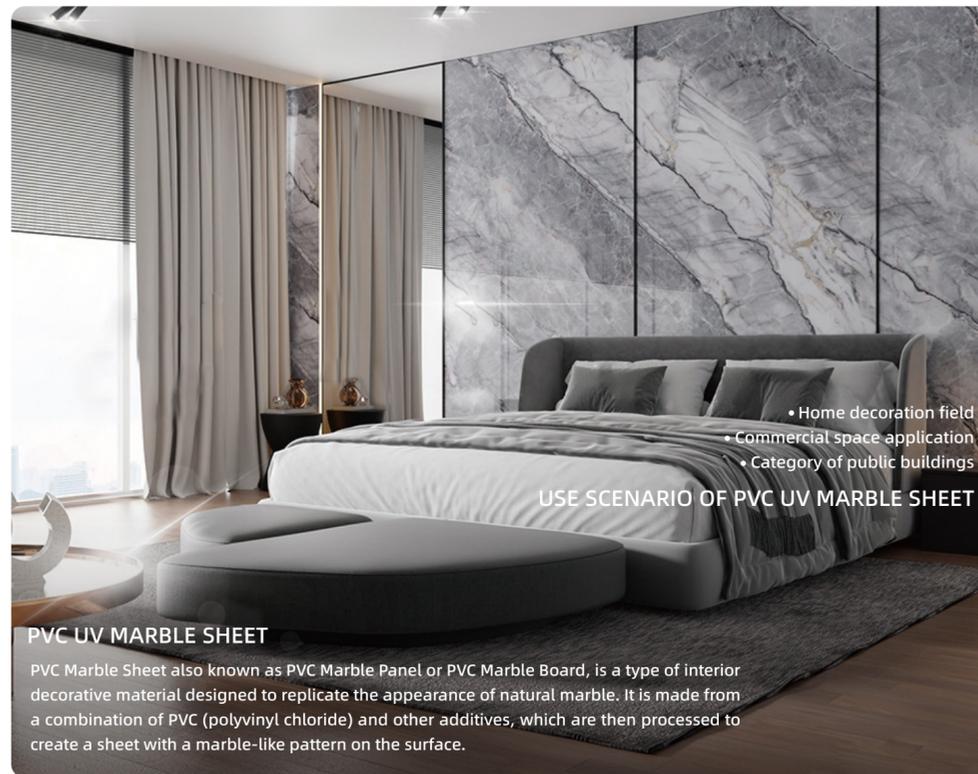

• Home decoration field
• Commercial space application
• Category of public buildings

USE SCENARIO OF PVC UV MARBLE SHEET

PVC UV MARBLE SHEET

PVC Marble Sheet also known as PVC Marble Panel or PVC Marble Board, is a type of interior decorative material designed to replicate the appearance of natural marble. It is made from a combination of PVC (polyvinyl chloride) and other additives, which are then processed to create a sheet with a marble-like pattern on the surface.
